CR11938 SU MIGRATE CHECK ERROR .....	3
<b>XOS.....</b>	<b>3</b>
CR11925 XO PROCESSING FIXES.....	3
CR11940 XOS PARSING FIXES .....	3

## Introduction

---

Changes marked with a ‘\*\*’ indicate fixes to high severity issues and it is highly recommended that the service pack is installed if you are likely to be affected by these issues.

Changes marked with a ‘\*’ indicates fixes to medium severity issues or a change in behaviour and again it is recommended that the service pack is installed if this issue is likely to affect you.

## Migration

---

### ***CR11944 Cross-CSE migrate migrate fixes***

---

- 1) A cross-CSE migrate copy tran file step can fail if the parameters (machine name, path, etc.) are lengthy since the total limit of 150# for the command line is exceeded. The limit has been increased.
- 2) The task dispatcher lock test can incorrectly fail for a cross-CSE spec migrate.

## System Updating

---

### ***CR11927 Provide alternate location of SSH utilities on z/OS***

---

It is now possible to specify, via system parameter SSHLOCN, the USS path where the secure shell z/OS utilities (ssh2, scp2) are located. The default path of /usr/lfp/ssh2/bin is still used if SSHLOCN parameter is not specified.

### ***CR11932 Backup Migrate Status Update***

---

The status update performed at the end of a backup migrate step can omit to update the status of a version to the B state

### ***CR11938 SU Migrate Check error***

---

The Post Migration SU check encounters a -811 due to duplicate rows retrieved from SELECT only.

## XOS

---

### ***CR11925 XO Processing Fixes***

---

- 1) Fixed issues related to use of &XOID as a parameter in an XO process definition
- 2) Fixed issue with XO processing not completing the task

### ***CR11940 XOS Parsing fixes***

---

- 1) Fixed an issue where parsed associations were not always stored
- 2) Improved performance for matching parsed associations
