Rapide Release Notes

Release 3.0.2

Contents

Important Notes	3
New Functionality	3
Methods to get and set a Pane's position	3
Fixes	3
Updated LOG4J Version	3

Important Notes

For this update you need to use GuardIEn 8.7.5 or later if you use GuardIEn to build Rapide applications. Do not copy the GDOPRAPG.dll to your GuardIEn folder unless you are using GuardIEn 8.7.5 or later.

New Functionality

The following features have been added in Release 3.0.2

Methods to get and set a Pane's position

New methods `getPanePosition` and `setPanePosition` are provided in the `RapideFunctionLibrary` allowing you to query the current position of a `PStep`'s Pane, and to set it. Setting it will come into effect next time the `PStep` is started (not immediately). The position requested by `setPanePosition` is stored as a local preference so is remembered between sessions.

Fixes

The following issues have been fixed.

Updated LOG4J Version

LOG4J java library has been updated to 2.15.0 which includes fixes for potential vulnerability issues.
